APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office.					
Retu	urned to applicant for correction				
Corr	rected application filed	NOV 1 4 1980			
Мар	p filed	NOV 1 4 1980 under 41702			
	AFRCE-MX, Norton Air Force Ba Street and No. or P.O. Box No. California 92409	at Sile Office ase, of			
wate	State and Zip Code No. ers of the State of Nevada, as hereinafte	r stated. (If applicant is a corporation, give date and place of incorpora-			
		names of members.)			
	The source of the proposed appropriati	on is underground Name of stream, lake or other source.			
2.	The amount of water applied for is	0 ne second-foot equals 448.83 gals, per min.			
		f acre-feetacre-feet			
3.	The water to be used for	Quasi-Municipal igation, power, mining, manufacturing, domestic, or other use. Must limit to one use.			
4.	If use is for:				
	(a) Irrigation (state number of acres to	be irrigated)			
	(b) Stockwater (state number and kinds	s of animals to be watered)			
	(c) Other use (describe fully under "No	o. 12. Remarks")			
	(d) Power:				
	(1) Horsepower developed				
	(2) Point of return of water to stre	eam			
5.	arce at the following point: S.E. 4 of S.E. 4 of Section 1,				
	T.3N., R.59E., M.D.M.; and be Describe as being within a 40-acre subdivision 31, T.4N., R.60E., M.D.M.	earing N.68 ⁰ 01'E. 6,800 feet to S.E. Corner Section on of public survey, and by course and distance to a section corner. If on unsurveyed land,			
6.	it should be stated. Place of use Coal Valley; inclu	des only federally owned land as described in			
	Exhibit "B"	ribe by legal subdivision, if on unsurveyed land it should be so stated.			
		and end about December 31 , of each year.			
8.	Description of proposed works. (Unde	r the provisions of NRS 535.010 you may be required to submit plans and			
		age works.) Diverted through pipes for construction			
	purposes from a drilled well State manner in which water is to be diverted	d, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.			
	•	·			

9.	Estimated cost of works approximately \$250,000					
10.	Estimated time required to construct works. One (1) year					
11.	Estimated time required to complete the application to beneficial use. Two (2) years					
12.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.					
	See Attachment A for explanation of total annual quantity of ground water					
	requested for the basin and its intended use.

	······································					
•						
	<u>C</u>					
	amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and					
٠,	o exceedcubic feet per second					
	al construction work shall begin on or before					
Proc	f of commencement of work shall be filed before					
Wor	k must be prosecuted with reasonable diligence and be completed on or before					
Proc	f of completion of work shall be filed before					
App	lication of water to beneficial use shall be made on or before					
	of the application of water to beneficial use shall be filed on or before					
	in support of proof of beneficial use shall be filed on or before					
	mencement of work filed					
Com	pletion of work filed					
Cultu	ral map filed					
Certi	A.D. 19					
-	218 (Rcv.) State Engineer Notate Engineer					

The attached application for the appropriation of ground water is for the purpose of supplying water for the construction and operational phases of the MX Missile System in Coal Valley. The attached application is one of nine for appropriation of ground water in the valley. Each application is for 384 acrefeet per year of ground water resulting in a total quantity of 3456 acrefeet per year for the ground-water basin. This is a conservative figure and is greater than that which will likely be required annually during the construction period. The 3456 acrefeet are requested for only a one to two year construction period within a span of five years beginning in 1984 and ending in 1989. Construction of roads and a possible construction plant and camp are expected to commence about one year prior to shelter construction and will require less than one fifth of the 3456 acrefeet figure. Ground water required for road construction is included in the 3456 acrefeet for shelter construction. Following construction the operational ground-water use is expected to be less than 300 acrefeet per year. This reduced quantity of ground water will be needed for the life span of the system which will be approximately 20 years.

The ground water for construction will be used for road compaction, dust suppression, shelter construction, miscellaneous structures, and possibly construction plants and camps. Ground water for the operational phase will be used for maintenance and surveillance facilities personnel as well as other possible support systems.

The place of use of the ground-water, as indicated on the attached water rights survey map, covers the entire valley in anticipation of the probably broad areal extent of construction activities. It is possible that once the construction planning has been completed, a request may be filed to change the point of diversion on the attached application to a more strategic location, however, the above stated total quantity of ground water will remain the same.
